

Redesign the Misleading Colored Chart

R.No: 38 Reg. No: 192425184 Name: U ROSHITHA

Each chart below uses color in a misleading or confusing way. For each one, answer the three questions in your own words.

Chart 1

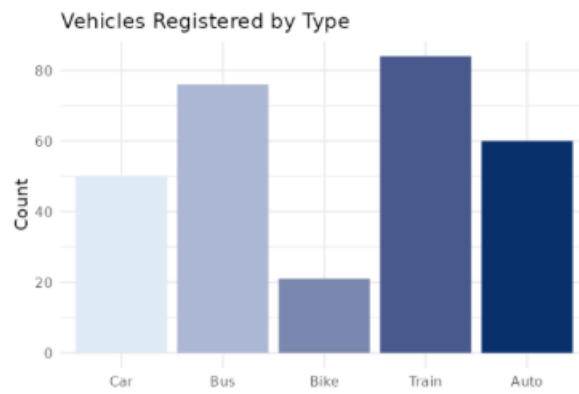

1. What is this chart trying to show?

2. What's wrong with the color choice?

3. Propose a better color scheme (describe it in words):

Chart 2

1. What is this chart trying to show?

2. What's wrong with the color choice?

3. Propose a better color scheme (describe it in words):

Activity - 1

Redesigning the Misleading Coloured chart

Chart 1 - Survey Response

1. What is this chart trying to show?

The chart shows the number of survey responses for different experience level: Beginner, Intermediate, Advanced, and Expert.

2. What's wrong with the color choice?

Different bright colors are used for each category, which can be distracting and confusing. The colors may also make the categories look more different or important than they actually are.

3. Propose a better color scheme.
I would use different shades of one color, such as light blue or dark blue, from Beginner to Expert. This would make the chart look simple and show the ordered level clearly.

Chart 2 - Vehicles Registered by Type

1. What is this chart trying to show?

The chart shows the number of vehicles registered for each type, such as Car, Bus, Bike, Train, and Auto.

2) What's wrong with the color choices?
The difference shades of blue are unnecessary because the bar already shows the difference through their heights. The color difference is also making some vehicle types appear more important.

3) Propose a better color scheme.
I would use one consistent color for all the bars, such as medium blue. If highlighting one vehicle type is required, I would use a different color only for that particular bar.
